

The Compact Mobile Office

The Compact Mobile Office is a productivity center on the move. It is well insulated overhead, underneath and on all 4 walls using sound deadening material to help eliminate outside noise from intruding. It comes with a nice half bath complete with quality commode and a bath sink. It comes in your choice of 2 layouts: 2 office with work center, or 3 offices. Both versions have storage for office supplies. The work center version has a large storage space under the work top. There is a comfortable bench seat by the entrance and a built-in conference table that folds down against the wall for convenient storage. It comes to you ready to use, turnkey. It is plumbed and wired for 110 volts AC with plenty of outlets and USB charging ports. The trailer has electronic braking assist and breakaway detection that automatically stops the trailer if it is disconnected from the tow vehicle. Available options include an instant water heater/fuel pack and a high-efficiency heat pump for heating and air conditioning.
