

The 28 ft. Mobile Workspace

The 28 foot mobile workspace provides the basic infrastructure for a productive workplace on the move. It provides for basic comfort with a half bath and it is fully insulated for comfort. The insulation also provides significant reduction of exterior sound. The half bath has a commode and a sink for hand washing. An instant water heater and fuel supply is available as an option. Another nice option is a high efficiency Pioneer heat pump which gives both heating and air conditioning. The mobile workspace comes professionally wired for 110 volts AC, with 220 VAC as an available option. Lighting will be per your specification. The mobile workspace can be configured as a machine or woodworking shop, or it can be set up as an office workroom. It can be configured to meet your specific needs, and provides work space for 10 people or more.
